

We're passionate about your skin...

We can change the way you see yourself and the way others see you.

We're passionate about your safety...

Cosmetic surgery and injectables are performed by Dr. Chaim Goldberg, who has treated more than 100,000 patients. Light therapy, body treatments and aesthetic services are carried out by highly qualified, trained technicians.

Imagine...

...looking in the mirror and seeing healthy, radiant, beautiful skin...

...saying goodbye to sun damage and wrinkles...

...banishing unwanted hair...

...no more puffy bags under your eyes...

...looking as young as you feel!

DR. CHAIM GOLDBERG

All surgical procedures, including laser skin resurfacing, blepharoplasty and injectables, are carried out by Dr. Chaim Goldberg, M.D., F.R.C.S. (C), director of The Goldberg Centre.

Dr. Goldberg provides his patients with the very best that medicine and technology have to offer. He specializes in state-of-the-art laser treatment for your skin and eyes.

TREATMENTS TO SUIT YOUR UNIQUE NEEDS

Laser Skin Resurfacing

This is truly skin rejuvenation! Patients may look 10 to 20 years younger after the procedure, and results last about 10 years.

A laser removes the surface of sun-damaged or wrinkled skin, at a precise and predetermined depth. This allows the skin to resurface, and restores elasticity by tightening the collagen fibers beneath the skin's surface. The appearance of deep lines is minimized. The procedure is also effective in treating facial scars and uneven pigmentation.

Blepharoplasty

Blepharoplasty, or eyelid surgery, removes excess skin and fat from the upper and lower eyelids. It can correct drooping upper lids and puffy bags below your eyes that make you look older and more tired than you feel.

While it can add an upper eyelid crease to Asian eyes, it will not erase evidence of your ethnic or racial heritage.

The results of blepharoplasty typically last for many years.

INJECTABLES

Restylane & Perlane

Restylane and Perlane are injectable fillers that create volume in the skin. They effectively smooth wrinkles and reduce lines around the mouth and forehead. They can also be used to shape the contours of the cheeks and chin, to correct deep folds, and to enhance lip volume.

Restylane and Perlane are natural, non-animal products with no risk of allergic reactions, eliminating the need for pretesting. Results can last more than six months.

Botox

Botox gives your skin a relaxed, fresh look. It is a simple, safe, painless way to smooth out unwanted frown lines and laugh lines. Botox can also be used to raise eyebrows and to shape facial contours.

Treatment takes only minutes and you can return to your normal activities right away. Results typically last from four to six months.

LIGHT THERAPY

Blu-U

Blu-U is a photodynamic therapy performed with a topical photo-sensitizing agent called Levulan. Blu-U treatment can remove sun-damaged spots, fine lines and blotchy pigmentation. It is effective in eliminating pre-cancerous lesions known as actinic keratoses.

Blu-U is very effective at treating acne in teens and adults. It minimizes pores and shrinks oil glands, reducing acne and improving the appearance of some acne scars. Blu-U means no hard-to-keep regimens of creams, no more pills with side effects.

Photo Rejuvenation

Intense Pulse Light (IPL) or photo rejuvenation, softens the appearance of aging and sun-damaged skin. It removes unwanted pigment while enhancing the production of collagen. Photo rejuvenation can:

- diminish areas of discolouration caused by aging, sun damage or broken blood vessels
- treat rosacea very effectively
- diminish fine lines, wrinkles and enlarged pores

Your skin will look and feel significantly smoother and refreshed after your first treatment. Improvement increases steadily with each additional visit.

BODY TREATMENTS

Laser Hair Removal

Laser hair removal is safe, effective and permanent for men and women. Treating all skin types, we use the Light Sheer Diode and Epilight Laser Hair Removal systems. Quick, needle-free and non-invasive, both Light Sheer and Epilight work just about anywhere on the body.

During treatment, the laser pulses for a fraction of a second, heating the hair follicle and impairing its ability to regrow. The number of treatments required depends on the individual. Significantly less hair grows back with each treatment, ultimately resulting in permanent hair reduction.

Microdermabrasion

This skin-freshening technique helps repair sun-damaged facial skin. Tiny crystals are sprayed across the skin surface to remove its dead outer layer.

Microdermabrasion is safe and effective for minimizing fine lines and wrinkles, acne scarring and superficial age spots. Depending on your skin's condition, more than one treatment may be needed.

Microdermabrasion & Chemical Peels

Alternating between microdermabrasion and chemical peels works effectively to keep your skin refreshed and healthy over the long term. For best results, we recommend two weeks between treatments.

Chemical Peels

A chemical peel is a simple and controlled procedure that removes dead surface skin cells, revealing the fresh, undamaged skin beneath. It is safe, pain-free and non-toxic.

You can expect a reduction in the appearance of wrinkles, increased smoothness and the minimization of pores. Chemical peels can also reduce acne scars and lighten pigmentation irregularities, evening out your skin tone.

Chemical peels are targeted to your skin type and take as little as 20 minutes. Generally, a series of three to six treatments will give optimum results that are quickly noticeable. Your skin will have a refreshing glow.

Phytomer Marine Skincare

Phytomer exclusive beauty products use only the highest quality ingredients derived from seawater, seaweed and algae. They contain naturally occurring trace elements and minerals that are vital for the correct functioning of human tissues. Phytomer provides the precise blend of ingredients the skin needs to repair and rejuvenate itself and look radiant every day.

PCA Skin

PCA Skin medical grade products are free of colour additives, synthetic fragrances, harsh alcohols, comedogenic oils and other known sensitizers. They deliver results without irritation and are especially effective in treating acne, hyperpigmentation, rosacea, and fine lines and wrinkles.

Obagi Clenziderm

Clenziderm is a prescription strength acne treatment that contains a patented, solubilized form of 5% benzoyl peroxide to penetrate deep into the follicle and treat acne where it starts. Clenziderm is clinically proven to provide visibly clearer skin in as few as two weeks.

AESTHETIC SERVICES

The Goldberg Centre for Cosmetic Surgery offers a full range of aesthetic services, including

- facials
- manicures and pedicures
- waxing
- eyebrow and eyelash tinting

For a full menu of aesthetic services and prices, call 416 754 9444 today. Be sure to ask about our

- monthly specials
